### THE PRIMARY OBJECTS.

THIS SOCIETY has been founded for the purpose of promoting the following Objects, which will be admitted by all to be of high importance both to Religion and Science:—

First.—To investigate fully and impartially the most important questions of Philosophy and Science, but more especially those that bear upon the great truths revealed in Holy Scripture, with the view of reconciling any apparent discrepancies between Christianity and Science.

Second.—To associate MEN OF SCIENCE and AUTHORS\* who have already been engaged in such investigations, and all others who may be interested in them, in order to strengthen their efforts by association, and by bringing together the results of such labours, after full discussion, in the printed Transactions of an Institution, to give greater force and influence to proofs and arguments which might be little known, or even disregarded, if put forward merely by individuals.

[For the special advantages secured to Country and Colonial Members and Associates in the Journal of Transactions, see below.]

Third.—To consider the mutual bearings of the various scientific conclusions arrived at in the several distinct branches into which Science is now divided, in order to get rid of contradictions and conflicting hypotheses, and thus promote the real advancement of true Science; and to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of Philosophy proper, based upon faith in the existence of one Eternal God, who in His wisdom created all things very good.

### The Journal of Transactions

Is arranged so as to secure its special usefulness to Country and Foreign Members and Associates (who form two-thirds of the Institute). It contains the Papers read at the Meetings, and the Discussions thereon.

Before they are published in the Journal, the papers themselves, and the discussions, are revised and corrected by their Authors, and MS. comments and supplementary remarks are added, which have been sent in by those Home and Foreign Members to whom, as being specially qualified to pronounce an opinion upon the respective subjects, proof copies of the Papers have been submitted for consideration. These arrangements, which cannot but add to the value of the Journal, are carried out with a view to the advantage of all, especially Country and Foreign Members, who thus find in the Journal much valuable matter, in addition to that which had come before those actually present at the Meetings. (The Journal is sent post-free.)

\* The Society now consists of about 1,000 Subscribers (NEARLY TWO-THIRDS OF WHOM ARE COUNTRY AND FOREIGN MEMBERS); including several Prelates and other leading Ministers of Religion, Professors of English and Foreign Universities, Literary and Scientific Men in general, and others favourable to the Objects. (The present average annual increase is upwards of a hundred.)
